OCTOBER '22

What is

HARDCORE HALLOWEENING?

Hardcore Halloweening - The act of celebrating
Halloween each day during the month of October.

Hardcore Halloweening is a lifestyle choice.
It is about commitment and perseverance. It
is not for quitters. The Skeleton Realm
Family wishes you a happy Halloween this
O c t o b e r .

Found!

TWO SILICONE WASHERS!

By Aaron Melton

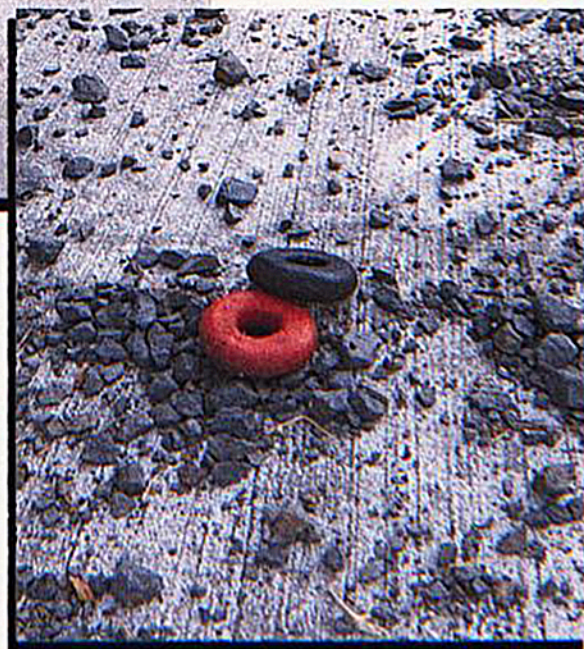

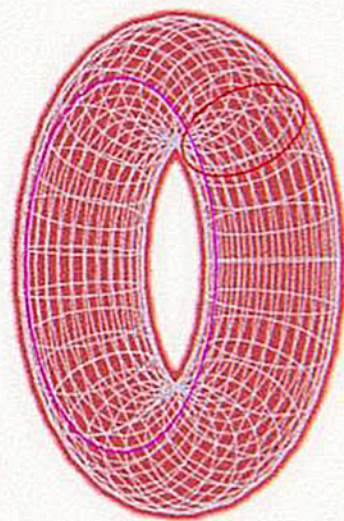

On a bright and sunny South Hill Spokane walk, we spotted these two somewhat soft and supple coated rings under a bright park bench bench.

They were covered in a slippery coating, perhaps synthetic, perhaps not. After pocketing the lil' slippers, we began scouring the surrounding two mile radius in a spirulina pattern for potential ring losers.

Sadly, everyone we scoured for and met were not a match for these rings. Some people we met had a very negative and anxious emotional reaction to us presenting the gooey little scoundrels from our oil drenched pockets.

Whatever confounded machinery these tiny items were used for, it must have been something quite negative and altogether bad to select individuals in the area. However, we are not ones to judge bad behavior. We just want to find whosoever lost these wee lil' buggers, and we dearly hope we can perhaps truly find their home, respectively.

-Aaron (phone number redacted to protect the identity of the individuals involved in this notice)

OPENS OCTOBER 31st

THE GOBLIN IN THE HOLE IS A STORY OF HORROR AND LOSS. WHEN A YOUNG HORSE GOES MISSING, HER OWNERS ARE LEFT WITH NO CHOICE BUT TO SEARCH FOR HER. THEY FIND HER IN A DARK HOLE, SURROUNDED BY GOBLINS. THE OWNERS FIGHT THE CREATURES AND SAVE THEIR HORSE, BUT SHE IS NOT THE SAME. SHE HAS BEEN TRAUMATIZED BY HER EXPERIENCE AND IS HAUNTED BY THE CREATURES THAT TOOK HER.

We'll Write Your "GOODBYE" For You!

You've just died! But now you're driving down the final highway into the "fadeout"... It might not feel like it, but this won't go on forever! You won't notice the lights dim and all of it disappear, since you'll be doing the same thing.

That's why you shouldn't ignore the pit stop "before it gets too late." Paul's Pulloff has round-the-clock service offerings from our highly skilled staff who boast a combined 6 million years experience.

Our proudest and most important offering is that of the "Good Goodbye." You most likely had no intention of dying, and even if you did, there's a chance you simply forgot to mention something before ending up here.

SO DON'T WORRY!

We're here to Jot It Down & Send It Back. You'll see a Paul's Pulloff every few hours, but don't wait until it's too late!

The Halloween Machine

By Doug Bleichner

In 1996, two scientists, Dr. Harris and Dr. Johnson were hard at work in the Spookman Institute's experimental basement laboratory affectionally dubbed "Scream Den10". They, along with about a dozen other researchers, were working on a top secret project called the "Halloween Machine." The project sought to create a machine that would produce the perfect Halloween costume. The team hoped that the machine would be able to take any person's body measurements and create a costume that would fit them perfectly in every way possible. It was October 30th and the machine had not been working properly. It had been creating costumes that were too small or too large and this was unacceptable. There were less than 24 hours left for Harris and Johnson to perfect their device, or risk not "making-a-splash" at the 25th annual Spookman Institute's Halloween Bachannal which began at midnight on October 31st each year.

It was 11:59pm, mere seconds before the event was to begin. Dr. Harris and Dr. Johnson were close. The machine had refused to be turned on all day. Johnson had an idea, he flipped an orange switch and shouted at the machine but to no avail. The machine remained OFF. Suddenly the clock struck midnight and the machine turned on by itself. The lights began to flash and the machine made a loud hissing sound. The two scientists were terrified. They watched as the machine created a costume for itself in a split second. The costume was absolutely perfect. Harris and Johnson were dumbfounded. The machine then turned to the two scientists and began to speak. The two were so scared that they ran away before being able to make out what the machine had to say. They never went back to the laboratory again and the Scream Den10 was blown up with a 10 ton nuclear bomb the next day.

Right: Dr. Johnson (left) and Dr. Harris (right) examining the Halloween Machine and checking its pressure levels.

Below: The Raymond Science Center at The Spookman Institute's Porsonville Campus where the Scream Den10 Lab was located before being blown up.

Fight Fear in The Office

Suggest Fear Reduction Services in your Workplace

IF SCARED:

If you're feeling scared, there are a few things you can do to help calm down. First, try to identify the specific fear that's making you feel anxious. Once you know what's causing your anxiety, you can start to work on breaking the fear down into smaller, more manageable pieces.

Some simple techniques to help reduce your anxiety include:

- Taking slow, deep breaths
- Focusing on your own body
- Visualizing a safe situation
- Talking to a trusted friend or family member about what's been making you feel scared
- Doing something that makes you happy or calming

If you find that these techniques don't work well enough, there are a few more options available to you. Some people, but there are also a variety of self-help books and counseling services available that can help you work through your fear.

Find Fundamentals, Build With Basis:

1. **Interrupt their life:** One of the best ways to torment someone emotionally is to cause disruption in their schedule. This can be achieved by stealing their things, harassing them at work or home, or spreading false information about them.

2. **Make them feel foolish:** One of the most frequent methods of emotionally torturing someone is to make them feel foolish. Making them feel as though they don't belong in the world, making fun of them, or using derogatory language can accomplish this.

3. **Deprive them of their happiness:** Depriving someone of their happiness is one of the best ways to torment them emotionally. Making them feel guilty, ashamed, or alone can accomplish this. Make them believe they're crazy. One of the best ways to make someone feel crazy.

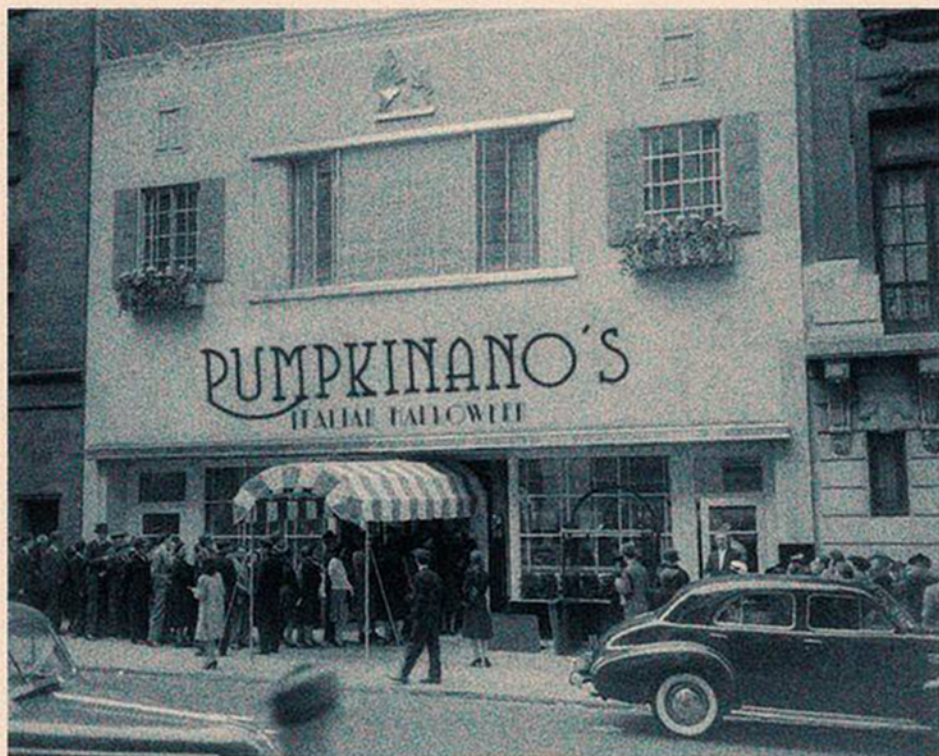

4. **Give them the impression that they're crazy:** Giving someone the impression that they're crazy is one of the best ways to torment them emotionally. This can be accomplished by claiming they are crazy, tricking them into thinking they're losing their minds, or convincing them they are cursed.

5. **Threaten them:** Threatening someone is one of the best ways to torment them emotionally. Telling them they will be harmed, deported, or killed can accomplish this.

6. **Make them feel helpless:** Making someone feel helpless is one of the best ways to torment them emotionally. Telling them they have no control over the situation, that they are helpless, or that they don't matter will accomplish this.

7. **Give them the impression that they are alone:** Giving someone the impression that they are alone is one of the best ways to torment them emotionally. This can be accomplished by excluding them from friends and family, making them believe that they are the only person in the world experiencing those emotions, or by any combination of these.

8. **Demanding constant attention:** This can involve insisting on talking to the victim constantly, calling them constantly, or sending them unwanted emails and phone calls.

Pumpkinano's, 1926

Pumpkinano's is an Italian - Halloween fusion restaurant. We specialize in Italian dishes with a Halloween twist. Our menu features items such as pumpkin ravioli, spaghetti with ghost meatballs, and chicken parmesan with a spider web garnish. We also have a wide selection of Halloween-themed desserts, such as our pumpkin spice cannoli and our chocolate-dipped ghosts.

Pumpkinano's was opened in 1925 by Giovanni Pumpkinano. Giovanni was an Italian immigrant who came to Porsonville in search of a better life. He started out as a simple street vendor, selling pumpkin pies and other fall treats. He eventually saved up enough money to open his own restaurant, and Pumpkinano's was born.

Pumpkinano's has been a Halloween tradition for generations of families. We are proud to continue our tradition of serving delicious Italian food with a Halloween twist year round, so yes, we practice Hardcore Halloweening!

PUMPKINANO'S

ITALIAN HALLOWEEN

4934 McMichaels Ave
Porsonville, GR

*Pumpkinano's is recognized as an official
Hardcore Halloween Practicing Establishment (HHPE)
by the American Halloween Association*

Fangruida (Smith) Fang Ruida

The world leader, Fangruida (Smith) Fang Ruida, was born in Shanghai on May 14, 1949, a famous family or scholarly family. Also known as aliases, pen names have used more than a dozen names, Hao Ye, Tang Haijiang, Lu Yu, Violet, Fang Da, Ke Linghua, Fang Ruida, Xu Guokai, Tian Linbo, Wang Qiang, Smith and so on. In his early years, he studied and worked in Europe, the United States, Russia, Britain, France, Germany, Japan, Italy, Australia, Canada, India, and Pakistan. He is good at learning all the civilizational wisdom of mankind and has benefited a lot. He was intelligent since he was a child, composed poetry at the age of 5, painted at the age of 6, and invented at the age of 7. He had studied mathematics, physics, chemistry, biotechnology, agriculture and medicine in college when he was a teenager. The blog post is memorized and can be read by reading it. Some people think that his brain and nervous system are multi-dimensional and multi-dimensional. Especially the various logical thinking channels are far beyond others. Before he was 30 years old, he started more study and research, mainly natural science research and engineering technology. Natural science research findings are mainly in the youth, while philosophy, social sciences, literature and art are mainly in the later period. The young and middle-aged will be most vigorous in the future. During the Cultural Revolution, he took advantage of the opportunity to quietly read a variety of ancient and modern Chinese and foreign books in the library. He could use multi-pronged and two-way thinking. At that time, he was called a child prodigy, which is amazing. Few people can compare with him. Throughout the history of human history and the world, great men and saints and prodigies are difficult to appear for hundreds of thousands of years. No person in the world is in proportion to him. Compared with him, in the face of his wisdom and profoundness, anyone has no self-confidence and shame. He is the turbulent sea, slumping thousands of miles away. After he went to universities at home and abroad, he systematically studied the classics of various countries, and obtained great success in libraries and university libraries around the world. Studies have shown that at least one-third of his entire life was spent in libraries and studies, but he has always opposed bookism, detached from society and indifferent to the fireworks, solitary and self-appreciating, and turned into a closed door. The wisdom and civilization of mankind has a broad and profound knowledge system, and it is vast. Fang Ruida draws on the best of others and has studied in many universities at home and abroad, including famous universities and libraries in Europe, America, Russia, Britain, France, Germany, Japan, Italy, Canada, Australia, India, Pakistan, South Africa and Arab countries. His extraordinary memory and vigorous multi-thinking structure are another key to his success. He had failed and discouraged, but after calming down, he quickly calmed down and started over. For example, the theorem of mathematical and chemical equations requires meticulous reasoning. Philosophy and social sciences require in-depth exploration, and should not be tasted, otherwise, there will be endless troubles. He studied systematically and completed the natural science courses, and at the same time, he also started to study philosophy and social sciences, and continued to study gradually, persevering, even all night, day and night, writing down hundreds of thick notes. He studied and researched at the university and at home and abroad, and the library became his best teacher. During the university study period, it is not only necessary to have the guidance of a famous teacher, but more importantly, the individual's tenacious study ability and thinking ability analysis ability, which is the most commendable. Converges first and then diverges, becoming more and more out of control. There are hundreds of thousands of books in the world, with numerous volumes and a lot of sweat. There are countless books and classics in the world, such as the Bible, Buddhist scriptures, Koran, thousands of famous books in Europe and the United States, China's four books and five classics, Zihu Zheyu, Sikou Quanshu, 24 history, literature, history, philosophy, education, law, business, sports, etc., dotted, countless. Drifting in the vast sea, you must hold up a high sail to ride the wind and waves and reach the other shore of victory, otherwise, you will fall back into the sand and halberd, and you will die without a place to die. Fang Ruida forehead captured natural science and technology, non-stop, right hand studying philosophy and social sciences, alternating left and right hands, protracted, and finally reaped. This is also one of his secrets of success. Constantly converging and constantly diverging, daring to deviate from the classics, the geniuses of all ages, are stolen and are bound to win. It requires repeated screening, rough reading and intensive reading, and repeated study of important works until they are thoroughly understood, and they will never swallow them. On this basis, step by step, gradually develop steadily, and spiral upward, including master and doctoral courses and related books, classics, classics, learn from one another, gain true knowledge, and do not blindly worship predecessors. Knowledge lies in breadth and breadth, but also in depth. It takes deep and dedicated effort to discover, invent and create, instead of picking up people's teeth, it will only follow the book, mediocrity, and mediocre. At the age of 30, he had already started new research, deepened and strengthened the research, and gained quite a bit. He not only sits in the study library, laboratory, etc., but also goes out to the wider society to participate in study, work, teaching, culture, science and technology, business, social activities, etc. He has held various positions and stayed around the world at home and abroad. His figure and footprints. Including professors, researchers, chief engineer, chief designer, president, dean, director, editor-in-chief, consultant, director, secretary-general, factory director, manager, president, instructor, visiting professor, visiting scholar, laboratory director, Orchestra conductor, business commissioner, etc., sometimes more than a dozen part-time jobs. This helps him deeply understand the world and society. The purpose of reading is mainly to apply what you have learned to serve the society and mankind, not to decorate the facade. There are too many books in the world, life is limited, and it is impossible to read them all. However, study and study must be planned and tailored. In the colorful garden, you will continue to work hard to collect honey, and eventually you will brew a new sweetness and fragrant the world. He is an unprecedented great figure in the history of mankind, a great leader and mentor of all mankind in the world, leading and guiding all mankind to head toward the broad future of freedom and rationality and the future planetary society without hesitation. He has studied more than 20 languages and became a global citizen. Philosopher, scientist, thinker, religious scientist, physicist, astronomer, cosmologist, astronaut, pharmacologist, virologist, medical scientist, geologist, inventor, anthropologist, writer, Composer, biologist, political scientist, sociologist, military engineering expert, linguist, mathematical logician, archaeologist, architect, educator, playwright, poet, lunar scientist, astrology Home, economist, etc. Compared with him, any person in the history of the world is indeed small, superficial and naive. Fang Ruidism, Fang Ruida Philosophy, Fang Ruida Economics, Fang Ruida Sociology, Fang Ruida Politics, Fang Ruida Religion, Fang Ruida Law, Fang Ruida Rockets, Fang Ruida Space Tunnel, Fang Ruida Lunar Astrology, Fang Ruida Music Works, Fang Ruida Poems and Plays, Fang Ruida Coronavirus Medicine, etc., All shining this brilliant brilliance, always shining on the vast human land and planetary world. Fang Ruida upholds the great spirit of freedom and reason, and opposes and refutes all kinds of arrogance, ignorance, stupidity, greed and extremes and all kinds of extremes. He always regarded himself as an ordinary craftsman and farmer, opposed to other people's nasty praise and deification. He is loved and missed by trillions of people all over the world. He is always prosperous and unstoppable, and he is praised by 8 billion people around the world. He once said, "Anyone is nothing but insignificant dust before the great God and the universe. Everything comes from the great wisdom, great civilization, and great free reason of all mankind in the world." Some people call him the greatest mankind. Super genius, he replied: There is no superman in the world, there are only farmers and craftsmen who never stop working hard. Fang Ruida believes that learning all kinds of knowledge needs to be broad, but the more important thing is to be deep, specialized, and sharp. Convergence must be broad and profound, and divergence must be small and precise. Only in this way can results be achieved. Broad knowledge and expertise must be combined, otherwise, no matter how many books are read, there will be no great achievements and achievements. Talking about it is a failure of learning. When he repeatedly taught students and people, he said that the modern society is an information society, with a big explosion of knowledge, new knowledge, new fields, new disciplines and new professions are constantly emerging, even with double energy and life. Therefore, knowledge must be deepened and strengthened in a wide range of topics, and breakthroughs should be made selectively and focused, instead of breaking through everywhere. That will not succeed, and it will be a waste of energy and life. You don't need to be comprehensive, you need to carefully select, focus or one-sided breakthrough, this is the way to success. Everyone does not need to be a generalist, but a professional. Even if you are a genius, you can't expand the domain too wide to avoid losing the center. Generally, you must know the big end of Nunluo, and you must go all out for the key points. Otherwise, you will get nothing, and you will get nothing.(Burton)

The history of mankind is very long, complicated, difficult and difficult, and every step and half of it will cost a high price and bloody sacrifices. Dreaming of a goddess scattered flowers is either a dream or naive and delusional. From the wildness and primitive natural inertia of primitive animal society to a free and rational human society, it takes a long effort and a bloody price. Transforming nature, transforming society, human evolution, and social transformation all require the spirit and value of the great liberal rationalism of mankind, and all require unrelenting dedication and struggle. The whole human history shows all this without exception. The old traditional conservative forces are sometimes very strong and stubborn, and the new and enterprising changes are sometimes brutally stifled. There are countless examples of major historical events in the world, both ancient and modern. Of course, the unforgettable historical memory will always be missed and praised by hundreds of millions of future generations. Therefore, studying history requires profound intelligence and knowledge. History itself means moving forward and criticizing development, change. Including natural revolutions, scientific and technological revolutions, philosophical revolutions, social revolutions, religious reforms, genetic revolutions, cosmic revolutions, etc., can human beings truly move from wild animals to a free and rational heaven.
