PUMP IT HARD!**

# BALLOON MAN IS BUSTING! and not just for Thanksgiving...

## Enjoy BM Year Round.

Balloon man came early this year... But not TOO early! He always comes for thanksgiving but now hes going to stay afterwards. He will stay all year now. He will stay until the end of 2023 and then he will actually stay all of 2024 also. It's time to get excited about balloon man now. If you're not excited please get p umped up! Balloon man will be great.

ENJOY ONE MINUTE WITH  
BALLOON MAN FOR ONLY

# Sand doesn't stand a chance...

## Introducing the All-New 2024 Orb Roamer

### Relax

Relaxation is much easier now that the seats have been upgraded. The old seats are GONE, we are now using seats that do not hurt the passengers OR the driver.

### Explore

Take your OrbRoamer's "TopOrb" to the "ends of the earth" like never before. Watch as your TopOrb enters new states and territories. The TopOrb will glow bright as you move. Wow.

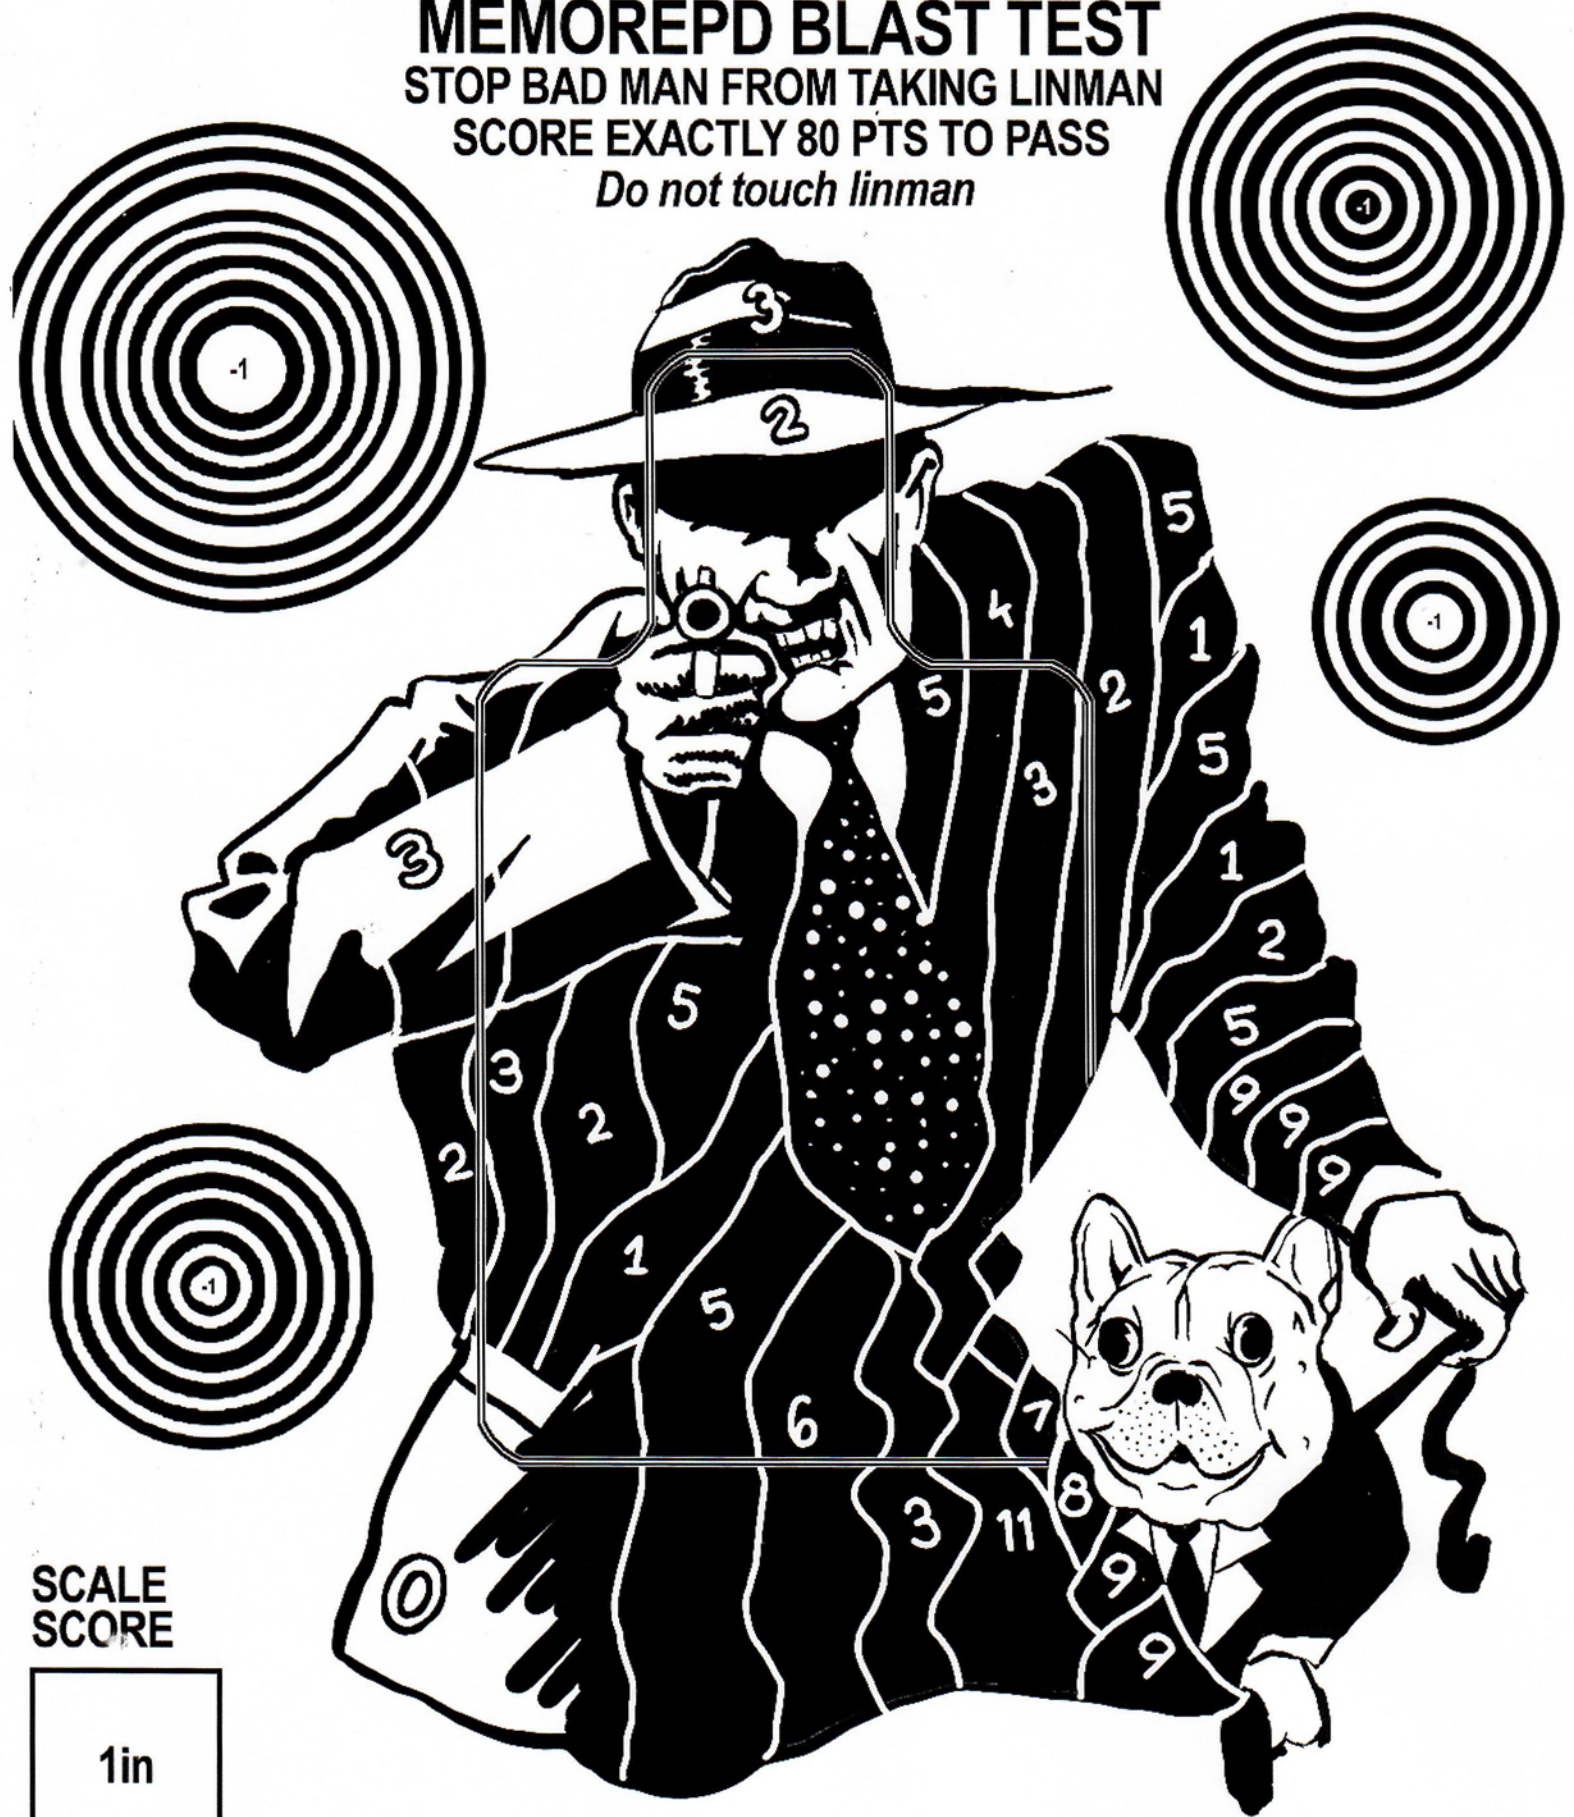

### Anihilate

Sand beware: The 2024 OrbRoamer blasts through sand like glass. The wheels pump down into the sand so hard that it will leave you screaming. Rocks and sand? Yeah Right...

# INTRODUCING EPIC PLANTS

THE LIKES OF WHICH YOU HAVE SEEN BEFORE

red style

yum

who is this man? he turned up in my garden out of the blue five days ago and replaced all the grass with astroturf, and since then he's just been idling there, without moving an inch. i can't tell if he's even breathing. he didn't notice me taking this picture at all.

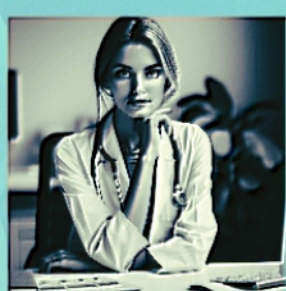

some of that traditional green swagger with blue steeze to match

NO  
they are  
NOT for sale, stop asking

"Dear Customer,

I am Dr. Jane Spraywell, the inventor of the Body Nozzles system. I would like to extend my heartfelt thanks to you for your purchase. Your trust in our product is greatly appreciated. It has been my lifelong passion to enhance personal care and hygiene practices, and with your support, we are one step closer to realizing this vision. I am confident that the Body Nozzles system will provide you with a unique and efficient method of interacting with various substances. Thank you for joining us on this journey towards innovation and convenience.

Warm Regards, Dr. Jane Spraywell"

## What to expect:

The installation of the Body Nozzles system is a surgical procedure that is performed by a qualified healthcare professional. Here's a general description of how it might be done:

**Consultation:** Before the procedure, you'll have a consultation with your healthcare provider to discuss your health history, the process, and any potential risks and benefits.

**Preparation:** On the day of the surgery, the area where the nozzles will be installed is cleaned and prepared. Anesthesia is administered to ensure you're comfortable and pain-free during the procedure.

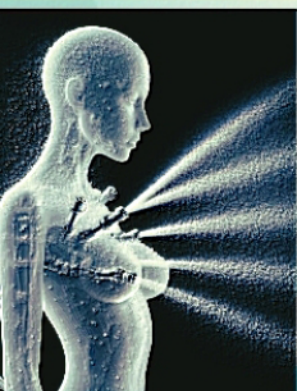

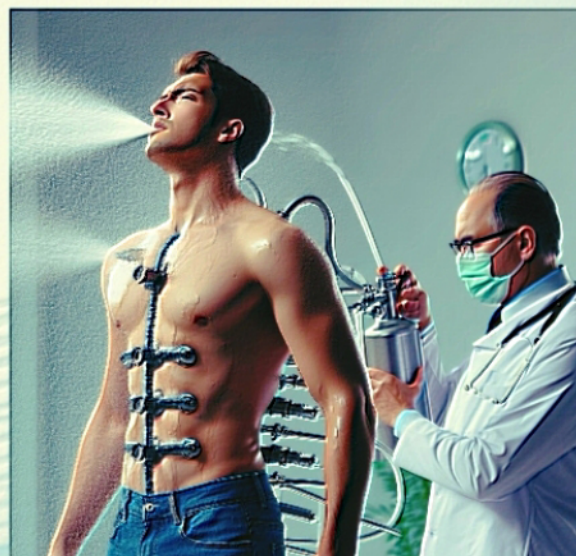

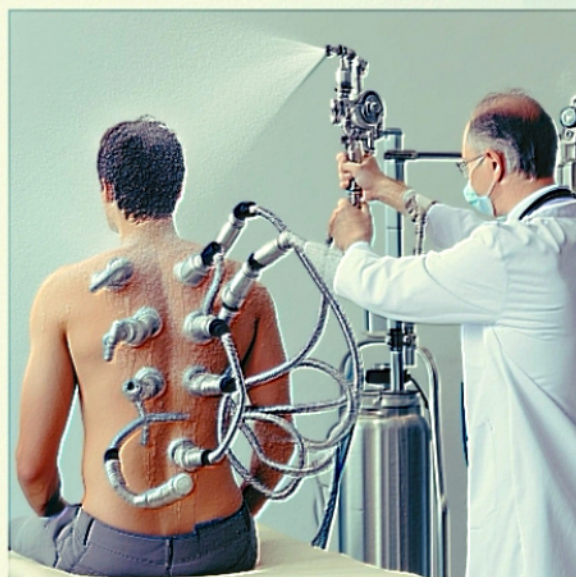

**Installation:** The surgeon makes a small incision in the predetermined area and carefully inserts the Body Nozzle. The nozzle is designed to integrate seamlessly with your body's natural systems.

**Connection:** Once the nozzle is in place, it's connected to the necessary systems in your body. This could involve linking it to certain glands or fluid systems, depending on what substances the nozzle will release.

**Testing:** After installation, the nozzle is tested to ensure it's working correctly. This involves using the dedicated app to control the nozzle and monitor its output.

**Recovery:** After the procedure, there will be a period of recovery during which your healthcare provider will give you specific care instructions. This may include wound care for the incision site and information on how to use and maintain your new Body Nozzles.

Remember, this is a simplified description of what could be a complex medical procedure. Always consult with a healthcare professional for accurate information.

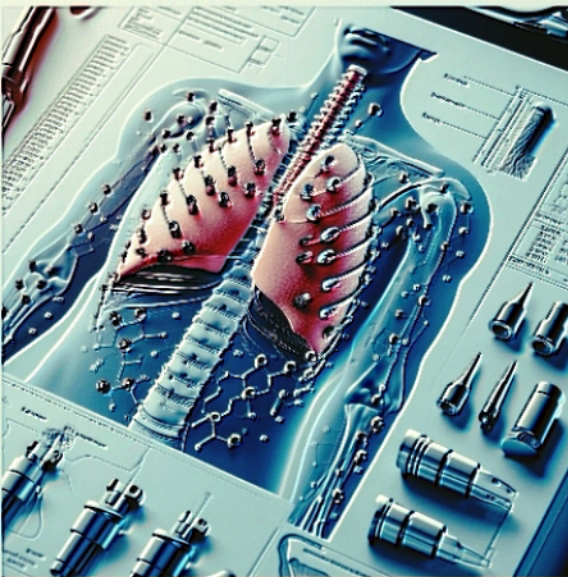

## "Can I use my nozzles without the app?"

The Body Nozzles are designed to be controlled via a dedicated app for safety and convenience. The app allows you to adjust settings, choose substances, and monitor the status of your nozzles.

While the nozzles themselves are physically installed in your body, their operation is managed digitally through the app. This design ensures that only you have control over your Body Nozzles and can adjust them according to your needs.

Therefore, using Body Nozzles without the app is not recommended as it could lead to misuse or malfunction. Always use the provided app to control your Body Nozzles and consult with a healthcare professional if you have any concerns or questions.

The healing process after having the Body Nozzles installed can vary depending on several factors such as the individual's overall health, the specific location of the nozzles, and the care taken post-surgery.

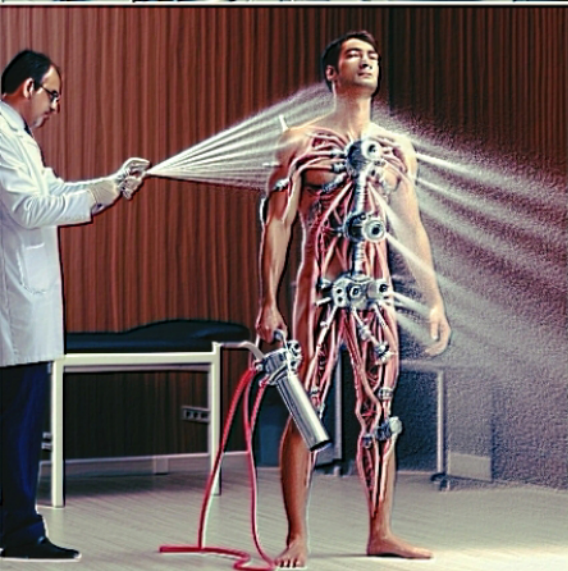

Generally, minor surgical procedures may require a few days to a couple of weeks for the initial healing of the surgical site. However, complete healing and integration of the Body Nozzles with your body systems might take a few weeks to a couple of months.

During this time, it's important to follow all post-operative care instructions provided by your healthcare professional. This may include keeping the area clean, taking prescribed medications, and avoiding strenuous activities.

Remember, this is a general estimate and the actual healing time can vary. Always consult with your healthcare professional for accurate information. They will be able to provide a more precise timeline based on your specific circumstances.

"What is the range of substances that can be sprayed?"

The Body Nozzles are designed to spray a wide variety of safe and non-toxic substances. Here are some examples:

**Liquids:** Water for hydration, perfumes or body sprays for a pleasant scent, or even your favorite drink for a quick refreshment!

**Gases:** You can connect your nozzles to an air source for a refreshing breeze on a hot day, or to a heat source for warmth during colder months.

**Solids:** The nozzles can release safe, biodegradable solids such as confetti for celebrations, or glow-in-the-dark particles for fun night-time effects.

Remember, the substances should be safe for both you and the environment. Always consult with a healthcare professional before introducing any new substances to your Body Nozzles. Enjoy exploring the possibilities with your Body Nozzles!

Discover a world of connection with NozzleMatch! Our dating app is designed specifically for individuals with Body Nozzles. Connect with like-minded people, share your experiences, and find your perfect match. With NozzleMatch, love is just a spray away!

"The Body Nozzles are easy to use and highly efficient. They have not only improved my hydration and nutrition but also become a source of entertainment. Spraying soda at unsuspecting friends in the grocery store has led to many laughs and memorable moments."

Introducing the Body Nozzles Solid Expulsion Upgrade! This groundbreaking enhancement to our existing Body Nozzles system allows for the expulsion of larger solid objects from the body.

Designed with advanced technology and precision engineering, this upgrade provides a safe and efficient method for handling solids. Whether it's a quick way to dispose of unwanted items or a novel approach to magic tricks, the Solid Expulsion Upgrade adds a new dimension to your Body Nozzles experience.

Please note: This upgrade is intended for use with non-hazardous, edible and non-edible items. Always follow safety guidelines when using Body Nozzles products. Enjoy the convenience and innovation of Body Nozzles, now with even more versatility!
